Appfabriqa Creative Inc.

Re: Mobile App Developer

Dear Hiring Manager,

As a newly UBC computer engineering graduate, working with Appfabriqa would allow me to apply my knowledge of web/cloud technologies, computer programming and my teamwork ability to contribute to Appfabriqa and broaden my technical skills. As a technically inclined individual, I am enthusiastic about working for Appfabriqa to develop cutting edge social media solutions.

Throughout my demanding academic venture at UBC, I have practiced different technology/business domains which provided me opportunity to learn new technologies. In addition to my competitive technical projects at UBC, my diverse work experience has also strengthened my competency using various programming languages. Furthermore, I am familiar with designing, programming, testing and debugging Android apps with Java using Eclipse or Visual Studio. I researched, implemented and tested my own personal site using HTML5, CSS and JQuery, but I am still in the process in learning the various new programming frameworks and tools.

I'm a quick-learner, self-starter and motivated team player with ability to accomplish tasks independently. Through my work experience and other professional activities, I have strengthened my interpersonal and presentation skills. I aver that with my cumulative experience and skills, I would be an asset to your company. I would appreciate if you give me an opportunity to discuss more about my credentials and the position. I hope to hear from you soon.

Sincerely,

Xin Huang
